LORDLY ROCKIES SETTING FOR LETHBRIDGE MINERS' PICNIC; HEARTY WELCOME AT COLEMAN

1500 Spend Day in Heart of
Mountains—Ideal Weather
Favors Outing

COLEMAN, July 26.—A glorious day of Alberta's famous sunshine favored the annual picnic of miners from Galt No. 6 mine, with their families, to the number of about 1,500, and from the time of their arrival at 10:30 this morning till their departure at 3:30 p.m. for their homes at Lethbridge they revelled in the beauties of the mountains and dells of this section of the Crow's Nest Pass.

Arriving in a special train of 17 coaches provided by the Canadian Pacific Railway for the mine employees, the big party was met at the station by representatives of the town council and Board of Trade, and after greetings had been exchanged, the Coleman citizens band and Lethbridge Caledonian pipe band, under Pipe Major Moore, headed the procession to the lovely sports ground a short distance from the town, which with its great number of peaks and mountains, with the lordly "Crow" towering over them all, provided a splendid setting for the excellent program of sports arranged by the Lethbridge miners committee.

Address of Welcome

On behalf of the citizens a brief message of welcome was extended by Deputy Mayor J. Moore, who expressed his pleasure at the visitors deciding to visit Coleman this year, and assuring them that the entire community sincerely hoped their brief stay would be most enjoyable. In honor of their visit the local committees of the miners had secured a holiday at both the International and McIlroy mines, so that Coleman people could join with the visitors in partaking of the pleasures of the day.

The large party very soon picked out shady spots where they enjoyed lunch, and from immense urns which had been placed in position the day previous so that fire could be lighted beneath, coffee was quickly served, the sweet mountain air and the four-and-a-half hour train journey from Lethbridge inducing healthy appetites.

The skirt of the pine forest through the hills put everybody in a happy frame of mind, and doubtless caused many a mind to wander back to the hills and dales of Bonnef Scotland, where quite a large number of those present hailed from. Theinner man having been satisfied, a program of sports and athletic events of all

kinds for young and old was commenced and which were entered into with the heartiest enthusiasm, one of the most keenly contested events being the married women's race, which demonstrated that Lethbridge has a number of lady sprinters who might well qualify for the Olympic games.

Coleman Wins 7-3

During the afternoon a baseball game between Lethbridge and Coleman teams furnished entertainment for the fans, in which Coleman won by a score of 7-3. While the game was in progress, the Lethbridge pipe band furnished spirited music for those who loved to take part in the old Scottish dances, and with the striking uniforms of the kilted players and the dancers on the green, with a background of trees and mountains, it was indeed a scene well worth remembering and which could not fail to make it appeal.

In the evening Lethbridge and Coleman miners football teams played, the local team proving the victors by 4-0.

Diversion was furnished down town in the arena rink from 5 p.m. till the train departure by dancing, for which Milner's five-piece orchestra which accompanied the excursion furnished the music. The Coleman Elks carnival also opened up, making the rink a scene of color and amusement.

Band Concerts

On the streets Coleman citizens and the Lethbridge pipe band whiled away an hour prior to the rain's departure by playing alternate selections, which delighted a large number.

The officials of the committee in charge of arrangements from Lethbridge were Fred Pomech, president; Elmer Blane, treasurer; Mrs. Blane, recording secretary, they being assisted by a committee of 35. The day's program proceeded without a hitch and the visitors all highly pleased by splendid weather being a predominant feature of the success and enjoyment of the day.

As the longest passenger train which has visited Coleman pulled out, cheers were given and good-byes waved, visitors and hosts alike expressing the general opinion that it had been "one grand day."

Coal Production Down in May

Production of coal in the Crow's Nest coal field during the month of May was very much below the same in 1927. In the latter month it was 173,756, while for May 1928 it was 117,343, being 56,413 tons less. These figures are taken from the Western Canada Coal Review.

Coleman, Alberta, Thursday, July 26, 1928

Danish Jazz Late

Excepting a recent term at Wellesley College, these young ladies, Miss Peggy Lester, and her sister Adele, have lived exclusively in Copenhagen, capital of Denmark, where their father is consul-general for the United States. Here they are sailing aboard the Cunarder "Aurora" bound for home. Denmark's native "jazz" is not the best, and United States visitors are somewhat late arriving in Copenhagen, they said; but young Danes are very sociable, young women may vote, and the winter climate is mild—of which other "jazz" difficulties. The seven hundred passengers of the big Cunard liner said that the diplomatic sisters were ambassadors of beauty as well as goodwill.

NOTES OF THE CANADIAN LEGION Coleman Branch

"BILL'S" AN ARTIST

Comrade "Bill" Graham, the genial steward at the Canadian Legion club room, will perhaps demur and blush when he reads this—he is so modest—but he has made a really fine job of kalsomining the place. "With so much smoke floating around it has begun to assume the appearance of a dug-out; now that Bill has spent a few days slapping down one can see the pictures on the wall a little more distinctly. He asked us not to say a word about it in the paper, for fear he would have some other jobs of a similar nature wished on him, but who could refrain from giving Bill the word of praise to which is so justly entitled?"

While on the subject of the Canadian Legion, Pete Smith, the secretary, states that next Saturday evening at 6:30 o'clock will be played the last game of the season of the "Crown" League, the opposing teams being Bellevue and Coleman. Jim Yates, one of the star players, expects to scintillate more brightly than ever, so that he will likely outshine himself. The line-up will be extra good, says Pete, and as the Legion has sponsored football throughout this end of the Pass during the season, he feels there should be a good turn-out to the closing game, and so give the boys a boost. The boys have not asked for any donations or hand-outs—but they have relied on the quarters they collect at the games to finance—and they are deserving of support in their efforts to keep the old game alive in this and neighboring towns.

Somebody asked about the war memorial fund, and what is the intention in regard to it. The sum collected through the efforts of the Legion is far short of the amount necessary to erect a worthy memorial, and the committee of citizens appointed for the purpose of deciding on what form the memorial should take have apparently just allowed matters to drift. It is time that interest should be revived in the project. There are many to whom no memorial is needed to remind them of the sacrifices of war—as long as they live the memory of dear ones will ever be green. But it is fitting there should be some outward reminder or recognition by Coleman citizens of sacrifices nobly endured. We honor our worthy dead in the fields of science and art who have contributed "something" worth while to mankind. Much more so is it deserved by those who forsook home and all that was dear to them when their country called.

For further particulars apply to JOHN CURRY, Sr., Secretary WM. KERR, President Bellevue, Alberta

On Monday night a number of the boys assembled to give Comrade Tom Merriman

ROD AND GUN CLUB OUTING NEXT SUNDAY

The second competition this season will be held next Sunday at the North Fork, and members will assemble at the town hall at 6 a.m. sharp. If you want to be sure of getting there, advise Secretary Rushton a couple of days in advance. No excuses will be accepted, for he cannot run around town at that unearthly hour on Sunday morning looking for cars to take those who "forget" to let him know they were going. Grasshoppers will not be supplied—you must catch your own—but the executive will see that crackers and cheese and a keg of beer goes out on the commissariat wagon. Another rule to be enforced is that those swimming after the trout will be disqualified from the prize awards.

HOSPITAL NOTES

Alex. MacKinnon, last week was operated on for appendicitis, is now making steady recovery.

Mrs. Brocklehurst was discharged from hospital on Sunday, and the present is staying with her parents at the Greenhill Hotel.

Mrs. Mingchin, of the hospital staff, has resigned.

Margaret McCulloch underwent an operation on Tuesday of last week.

Major Burns is making steady progress following an operation, and with a few friends is making preparations for a two weeks' vacation in the district north, where they will establish a camp in the heart of the mountains and enjoy themselves trout fishing.

Dr. Stewart, whose marriage was recently announced to Miss Oshlere, of Strathclair, Man., arrived with his bride on Thursday last, and left again for the coast to continue their honeymoon trip. They are expected to return in about two weeks.

NO GREATER LOVE STORY HAS EVER BEEN TOLD!

Love that endured all the hard knocks of a tough guy fighting and came back for more—love that great stories could not even move—love that came through when ever his gales failed—that made a hero out of a coward—love that carried two unfortunate souls into a heaven of bliss.

Sixteen solid weeks on Broadway at \$2.00—and over capacity at every performance! Critics said: "Cinema knockout"—"100% audience picture"—"Wins the championship"—"One of the best pictures of the year"

MATINEE ON SATURDAY AT 2 p.m.

Your best move,
Smoke **OGDEN'S**
CUT PLUG

SAVE THE VALUABLE
"POKER HANDS"

is yours. You and I will never part, and your pups are welcome, too. Come in." Cleo came in, with a pup in her mouth, smiling as broadly as she could without altogether dropping the pup.

The dog's hunger was pathetic. All the more because it tried so hard not to appear ravenous. This was evidently her first good meal for several days. The puppies, tired out by their adventurous night, were soon fast asleep in a box in which Helmi had placed an old coat of Jack's. Cleo was with them, curled up into an indistinguishable mass of sable and white wool, with only one little round head showing.

When Cleo had eaten her breakfast she stood at attention, her eyes fixed on Helmi's face, as if she were trying to read her mind.

Helmi patted the dog's head. "Takes a sleep, Cleo," she said, kindly; "when I get my house cleaned up and my clothes dried I will tell you an interesting story. Now, where we are going to live, you and I and our families, but I know we are going to live together. I heard many times in the city that no one wanted a girl with a baby, so I suppose a girl with a baby and a dog and three pups is not wanted either. But still I have faith in God, Cleo—He always helps. Now lie down and be happy we have enough here for a few days."

Life had changed for Helmi. The demands of heart and hand and stomach had been laid to rest by the hand of God, her friend. In her simple theology God had actually reached down His hand through the blackness of the storm and struck the magistrate dead, because he had brought such evil upon her, and to prevent her from committing the crime of murder. God would be her friend for forever; she would trust Him now, whatever came. And now no more tears for her baby. Liu was in God's keeping—God and the broken hearted man who had spoken so kindly to her.

When Helmi awoke with brain cleared of her midnight terrors and a body eased of its pain, she noticed the revolver, which through all her mad flight she had clutched in her hand. Horribly it reared to her the madness of the terrible night and the loathsome deed that she had done. And yet—and yet—now that her brain was clearer, she could not recall that she had really fired the weapon. Her hand had been the trigger when the shooting came.

She sprang toward it quickly, for she still felt what she wanted to do.

Opening the chamber with trembling hand, she found every cartridge was in its place!

Then the soul of Helmi was born again in thankfulness to God, and in a faith in His goodness that never again wavered, for God had saved her from sin. God had intervened to save her when her heart was farthest from Him. God was her friend. He loved her—He would not let her sin! With his own arms He had saved her.

After a couple of hours of vigorous work Helmi had her house spotless. Then she lay down to sleep, for a delicious weariness had come over her, and with it a sense of security and peace such as she had never known in all her life before. "Home and God," she said, "I can sleep."

It was the middle of the afternoon when Helmi awoke. Cleo was sitting beside her, watching her. The pups were still sleeping. She sat up, shaking out her golden hair. The fire had died down but the house was pleasantly warm.

Outdoors the sun shone brilliantly, and Helmi went out to inspect the camp she had made in the rear of the house. The sun had just come over the edge of the earth, sending a sheet of gold and rose along the top of the mist that filled the valley below. As she watched, encircled in her new-found gladness, the sunlight began to form into wisps and threads that curled and rose over the surface of the river, their upper ends twisting and thinning into the air.

A song burst from Helmi's heart, a song of gladness and love and faith—a song that the Blue Book had taught her:

"When the mists have rolled in
splendor from the beauty of
the hills,
And the sunshine falls in gladness
on the river and the hills."

These words whimpered beside her. Cleo had just come out of the cave. Helmi sat on her knees beside her, and kissed her honest forehead. "Cleo! Cleo!" she burst, "the dog god sent!"

CHAPTER XXXIX:

Helmi reached her own house that morning before the people of Eagle Mines were stirring. It was a sweet morning, without a trace of the storm of the night before, only that the air was washed clean and tasted cool in the mouth like a drink of spring water. She walked with her old sprightliness and without a single trace of fatigue.

Cleo followed her with one pup in her mouth, and Helmi carried the other two. The door of the house was not locked, and Helmi soon had a fire burning and a pot of porridge cooking for herself and the dog.

The hours showed the trace of the hunting parties that had made it their abode, and from the fact that they had left the house dirty and littered, Helmi knew that they were not real hunters, but only city boys who had come to the country to walk to do my farm work. I saw in the morning that there was something about the Vegetable Compound and thought

to give it a trial. The people need relief and I have told others what it does for me. I am willing for you to use my letter if you choose—Miss D. B. Pinkham, Wilton, Ontario.

New Farmers For Saskatchewan

New farmers to the number of 1,572 were added to Saskatchewan's population during the past year and 1,464 new farms were taken up, according to the Department of Agriculture.

The province's greatest increase was reported from the northwestern portion from Humboldt to Melfort, and east to the Manitoba line.

A miniature stampede was launched toward the district as soon as knowledge of the strike became general. Miss Rice reported that she had already received alluring offers for her claim by several leading Canadian mining interests.

Another Television Test

Demonstration In New York Shows Big Advance Made

The day when radio owners can tune in on sporting events and other happenings of interest and see them instead of merely hearing an announcer's description, has moved one step closer.

The Bell Telephone laboratories demonstrated their improved sunlight television apparatus which covered several full length stories as they moved about an area roughly the size of a room.

Previously television had been restricted to recording no more than a head and shoulders.

—John Greenleaf Whittier.

To know God: to love Him altogether; to live in the light of His countenance; to be satisfied with a little more; to rejoice in His goodness; to feel that He is with us.

—John Greenleaf Whittier.

The television cameras were clear as the average made and were marked only by an appearance of being under a paper thin sheet of water moving slowly across the picture. This defect, engineers believe, can be eliminated.

The new television was developed by Frank Gray and Dr. Herbert E. Ives of the Bell laboratories.

Discouraging Swarming

Method That Has Proven To Be Very Satisfactory

A method tending to discourage swarming has been tried with success at the Charlottetown Experimental Station of the Dominion Department of Agriculture. The plan is to add a shallow sugar of drawn concentric circles to the ground. It is believed that swarming is reduced by swarming. Being given increased room the bees were found usually to settle down and start building queen cells in this new and less crowded area of the hive. In due time it was necessary to inspect the hives and to watch for and destroy any new queen cells discovered. The superintendent of the station in his 1927 report states that this method has proved very satisfactory over several seasons.

Working on Red Trail

It will be good news to the Pass towns to know that work is proceeding on the Trans-Canada trail between Pincher station and Macleod. This has always been an obstacle to tourist traffic whereby the northern route has received the traffic that would travel over this route through the Rockies.

Writing to the Board of Trade here this week, A. T. Warnken, manager of the Western Canada Road Route Service, states he hopes the route between Macleod and Pincher will be completed this fall, and then we will have a gravelled highway. When that time comes, the Crows Nest Pass will receive hundreds and hundreds of tourists that is not getting at the present time, especially at this time of the season when the dirt roads are so terribly bad.

That there is need for all towns interested to co-operate in urging the government to complete this section is very evident, and there should be no cessation in their efforts, as this is a main artery of traffic, and an absolute necessity both for business and tourist traffic.

Horses Running at Large

That there is necessity for the town council to draft a by-law or take steps to prevent damage from horses running at large is very evident. People who take a pride in their home surroundings spend considerable time and money in beautifying their premises and planting trees, and their indignation can be imagined when they awake to find that wandering horses have made a grazing ground of their boulevards or lawns.

One cannot blame the horses, but certainly the owners should have more sense of what is right. If the animals are of such little value that the owners do not care what becomes of them, they should be rounded up and sold at auction. If nobody claims them, the only alternative is to destroy them. It is more humane to do this than to have half starved horses roaming around during the winter when feed is hard to secure, and at the same time it would eliminate what is now a very serious public nuisance.

The Late Bishop Pinkham

A link with the early history of the province of Alberta is broken by the death of the venerable bishop who carried the torch of the missionary spirit into this western country when it was all known as the Northwest Territories. The church and the west owes much to those pioneer bishops who are passing to their reward. The late Bishop Grisdale of Qu'Appelle was another of the type of the missionary bishop, though not having as long service to his credit as Calgary's bishop, and one who still survives is Archbishop Matheson, primate of all Canada, whom ill-health prevented attending the funeral of Bishop Pinkham on Saturday last.

As they pass on, younger men take their places, bringing modern ideas to take the place of the old, and so help forward the church's vital work in relation to our every-day life. The late bishop served his church and country well, and the esteem and respect evidenced on the occasion of his death shows that his good qualities were recognized in circles much wider than the domain of his own church.

His successor, Bishop Sherman, who took office early in 1927, will ably carry on the work in this diocese. Being a much younger man, his energy and executive ability will be of great value in enabling him to rear the superstructure on the foundation so well and truly laid by the departed Bishop Pinkham.

Building a Town

This can only be done by every business man showing how. They must be loyal to each other if they are to inspire loyalty in the community. There must be co-operation, and a willingness to do business with each other as far as possible, for the public is quick to notice and it is surprising that little acts which a tradesman imagines may not be noticed are observed and chalked up for reference. Possibly a newspaper office has more contacts with the general public than any other business institution, and it naturally gleans a considerable amount of information which never appears in print—in fact it would be in some cases quite startling were it to publish it.

"Darkness made visible," if such a term is correct, might well apply to Coleman's main street after sunset, the few feeble rays of light from a light bulb here and there serving only to enhance the gloom which pervades the business section. Some day—maybe—there will be a proper lighting system, when sufficient energy has been accumulated to stir the council into drastic action.

Showing Canada
her Opportunity
in World TradeAnother Striking Advertisement
by the Trade and Commerce
Department, Ottawa

The various striking advertisements of the Trade and Commerce Department, Ottawa which have appeared in Canadian newspapers from time to time are calculated to create at "the more trade consciousness" throughout the Dominion.

It was decided last year by the Honourable James Malcom, Minister of Trade and Commerce, that the Dominion's commercial agents should become more intimately acquainted with business opportunities outside their country. In order to accomplish this, the campaign of publicity was embarked upon.

Canada's external trade has grown in such proportions as probably few Canadians

HON. JAMES MALCOLM

realise. For instance, in the last fiscal year, ended March 31st, the Dominion's total exports were valued at more than a billion and a quarter dollars, or to be exact \$1,250,000,000. This represents an export of more than \$500,000,000 for man, woman and child in Canada. At the beginning of the present century Canada's exports amounted to less than 200 million dollars.

Another method of gauging Canada's export trade is found in the fact that last year 1,250,000,000 dollars worth of manufactured products alone amounted to about the same as her total production of manufactured products in 1910. In other words, Canada's total export trade in manufactured articles to-day as the total output of every factory in the Dominion twenty-eight years ago gives readers some comprehension of the immense increase in export business.

Most public men and business men in this country would be agreed that export trade is probably the most valuable asset the Dominion can have, and that it is a valuable asset, varied and so rich that it would be impossible for Canadians to consume them. Take wheat for example; it is marginally impossible for 6,000,000 people to consume 6,000,000 bushels of wheat annually. Canada's future prosperity therefore is bound up in seeking markets abroad for her surplus products.

When Canadian business men seek to sell their products in other lands, they cannot do so unless they are able to meet competition from thousands of other business men and producers living in other countries. They are faced with fierce competition in marketing their products and must depend on export business. To maintain this trade of a billion and a quarter dollars a year, the Canadian Government, it is believed, must become acquainted with the legal method known to business. They must learn how to pack their goods in the best manner, how to ship them, how to meet their buyers, how to keep contract dates, how to ship these goods by the most economical and direct route. And perhaps most important of all, Canadian goods must always be kept up to the standard of the same submitted.

Dr. D. C. D. Trade and Commerce, Ottawa, is doing everything in his power to further this export trade. Years ago a Commercial Intelligence Service was established, and now commissioners sent to the world's trade centres. In fact, Canada had the first trade commissioners sent to the world's trade centres. This system which has been inaugurated, a system which has been copied. To-day this country has 24 trained trade commissioners in strategic trade centres. More are to be sent for training to go to other places. The government has by subsidy, and other means, enabled first-class shipping facilities to these business men. Canadian business men are constantly on the alert, seeking out opportunities in the seas of Canada's products. They are aware that there is a chance of a Canadian order being placed, they immediately communicate with the Commercial Intelligence Service, giving them all the information they possibly can. This information in the disposal of any Canadian business or manufacturer. This system, due to years of some years' experience, is thoroughly organized and working smoothly. To-day the Canadian business man can, through this system, find out with little trouble, and no expense, if his products can be profitably marketed in almost any part of the world.

No one has ever been better fitted for the export system adopted by Canada, and so well have Canadian goods been received in the world's markets, that fairly predict that within a decade Canada's exports will double to the present figure. Hon. Mr. Malcolm as the responsible head of this department, is doing his best to keep Canada fully informed as to opportunities abroad. To do this he is reaching the people through newspapers, magazines and trade journals.

NOXIOUS WEEDS

Your co-operation with Provincial and Municipal authorities is solicited in the control and eradication of weeds. Keep your fields and roadsides free from these unsightly and costly pests.

Weeds reduce the yield and lower the grade of your grain, rob the soil of its fertility and cost money in dockage and transportation. Approximately 6,000 cars were required to haul the screenings from one season's crop in Western Canada to terminal markets. Will you not help to reduce this enormous loss?

Give your local weed inspector and the Provincial Field Supervisor in your district every possible support in dealing with the weed problem.

Canada's Market — The Empire

ROLL down the map of the world. Follow the British Empire red through the continents and across the seas. There you see beckoning markets for Canada—where fewer trade restrictions intervene, where British tradition is appreciated, where Canada is known. There we can sell. There we can also buy.

Canada is buying more Empire goods than ever before—things we cannot grow or make—raw materials for our factories. Since 1922 Canada's imports from Empire countries have increased 67 per cent. Last year we bought Empire goods to the value of \$250,000,000.

And what is Canada selling the Empire? Last year we shipped \$500,000,000 worth of our products to other British lands, an increase of 44.3 per cent. in six years.

The various parts of the Empire want more Canadian goods. A demand exists among them for Canadian manufactures, or for the products of Canadian lands or waters. But we must see that our exports are maintained at a rigid standard, that they are packed as consumers desire, and that our prices are right.

To encourage this growing Empire trade, eleven of Canada's twenty-four Trade Commissioners abroad, are working in Empire centres. They are familiar with the demands of the people among whom they live. Their services and the information they gather are at the command of any Canadian producer or exporter. To get into touch with Trade Commissioners, write the Commercial Intelligence Service, Department of Trade and Commerce, Ottawa.

When you buy Empire goods, you do a part in making possible greater Canadian exports to these sister countries. Where we sell, we must also buy.

The Empire Opportunity in Manufactured Goods

Of 38 groups of manufactured goods Canada sells the Empire to the total of \$4,500,000. You should remember that the Empire imports from all countries to the amount of \$2,571,000,000. The British Empire presents a tremendous opportunity for the development of export on these commodities.

People Respond at

Elks Carnival

Co-operation on Part of Public and Those Who Assisted in Booths Brings Success

Coleman Elks Carnival terminated Tuesday evening and the results will be very satisfactory according to the statement of George Brown, exalted ruler of the local lodge. The people have responded generously, and even though it was staged in the holiday season, when there is quite a percentage of people away, the financial returns have proved gratifying, and local community enterprises will benefit. The Elks officers wish to extend their thanks to the public, and to all who assisted in the booths and otherwise. Such co-operation is necessary for success, and this has been given in a most cheerful manner.

H. C. McBurney, chairman of the carnival committee, is well pleased with the splendid support given, and joins with Mr. Brown in extending thanks.

A. Brocklehurst was admitted to hospital on Tuesday.

MYSTERY ENDS BY FINDING BODY OF LOEWENSTEIN

Boulogne-Sur-Mer, France. — The finding of the body of Captain Alfred Loewenstein, missing Belgian millionaire, has cleared up most of the mystery surrounding his disappearance from a cross-channel airplane on July 4.

French and Belgian authorities will still have to determine whether Loewenstein accidentally fell from the plane as it flew 4,000 feet over the English Channel, or deliberately wrenched open the exit door and plunged to his death.

But the ugly rumors that the financier had perpetrated a gigantic hoax and was still alive were definitely set at rest by the finding of the body.

The hattered body was found floating face downward ten miles off Cap Gris Nez, by the Boulogne fishing smack 555, Cap. Jean Marie Grand, and was readily identified by a wrist watch engraved "Capt. Loewenstein, 35 Rue de la Science, Brussels."

Otherwise the body was unrecognizable, as it was in an advanced stage of decomposition.

The body was clothed only in under-drawers, socks and shoes, the latter bearing the name of an English maker. There was a severe wound in the abdomen and both feet were broken.

At the Boulogne morgue Dr. Euloyer made a formal post-mortem examination, and the mayor of Calais, Leon Vincent, drew up a signed official statement recounting the circumstances of finding the body and the result of the examination of the remains. No official conclusion was made public.

It is believed here that now that the mystery of the financier's disappearance has been solved, the French government will begin an official inquiry to establish whether death was accidental or a suicide, and if any of Captain Loewenstein's fellow passengers in the plane will share any responsibility for his death.

Bavarian Town Was Damaged By Floods

Oberramergau, Famous For Its Passion Play, Was Submerged

Berlin.—Oberramergau, the Bavarian town famous for its Passion Play, has been partly demolished by flood.

The town was submerged when clouds burst caused the river Lini to overflow. Bridges were swept away.

Torches had to be used in relief work until dawn, because the local power plant was flooded.

As floods menaced the Oberramergau district the neighboring Telesberg forest, near Fussen, was ablaze.

Considering Air Insurance

Canadian Companies Believe People Will Want This Protection

Ottawa.—Canadian insurance companies are considering special forms of insurance for civilians interesting themselves in aviation, it is learned. Recently a conference of actuaries and insurance medical authorities is said to have discussed the matter, realizing that soon the man who drives his own plane will be in the same category as the man who drives his own car, so far as the demand for insurance is concerned.

Motor Boat Beats Train

German Expert Drives Craft Nearly Mile a Minute

Cologne, Germany.—Fritz Von Opel, German sportsman and race boat expert, beat an express train in a race over a distance of 10 kilometers (6.2 miles) on the Rhine.

Von Opel drove his boat over the distance in six minutes and 12 seconds, 2½ minutes faster than the train running along the river bank. The average speed of the boat was 58.84 miles an hour.

Federal Government To Raise Floggings

Ottawa.—The Dominion Government is going to raise the punishment of flogging to increase the food supply of the country. It is to breed and train pigeons for purposes of communication. The department of national defence is to have charge of the work.

Glasgow, Scotland, is nearly fined because some of its municipal street cars exceeded the speed limit.

W. N. U. 1743

Receives New Appointment

Dr. Delury Of Saskatchewan University Will Go To Manitoba Winnipeg, Man.—Dr. J. S. Delury, of the University of Saskatchewan, will succeed Dr. R. C. Wallace as commissioner of mines and as professor of geology and mineralogy at the University of Manitoba. The appointment was announced by the government.

Prof. Delury expects to make the necessary arrangements with the University of Saskatchewan to make it possible to take up his work here September 1, when Dr. R. C. Wallace leaves to take over the position of president of the University of Alberta.

Prof. Delury is well known in Winnipeg and Manitoba. He was for many years the right hand man of Dr. Wallace in the department of geology and mineralogy at the University of Manitoba. In that capacity he rendered valuable service to the province. One of his latest contributions was a voluminous report which he prepared two or three years ago for the industrial development board.

It is only a year ago since he left to organize the department of geology at the University of Saskatchewan, as professor in charge of that department.

Dr. Delury is a graduate of the University of Toronto and of the University of Minnesota, and was in charge of the department of geology in the University of Idaho before he came to Manitoba in 1913.

Would Export Alberta Gas

Plan To Pipe Waste Gas To Saskatchewan, Manitoba and Montana

Lethbridge, Alta.—Alberta's problem of waste gas seems closer to solution and it appears to lie in the piping of the surplus gas to Saskatchewan and Manitoba cities, and the cities of Montana.

In an interview here, Hon. Charles Stewart, minister of the interior, gave it as his opinion the shipping of gas 800 miles to Winnipeg, serving intermediate cities, including Moose Jaw and Regina, was feasible.

Again exportation of gas from the Rogers' field, southeast of this city, is now possible under Federal permit. The Range Oil and Gas Company has spudded in another well on the Rogers dome just south and east of the 50,000,000 barrel field and the plan of this company and the Hardrock Oil Company, of Great Falls, who will drill the wells, is to have gas flowing through their pipe line into Montana by winter. A pipe line will be built to the Montana boundary, it is announced, either to link up with the present pipe line to Great Falls or as a separate line into that city.

Libel Action Settled

Action Was Brought By Cardinal Hayes Against London Newspaper

London.—Settlement of a libel action brought by Cardinal Hayes, of New York, against the Sunday Express was announced in the King's Bench division.

Counsel stated that a paragraph appearing in the newspaper had said that the cardinal was a man who exceeded the power of Kevin O'Higgins, Irish Free State minister of justice, on the ground that he was an English hirsling.

Counsel said that the defendants never suggested for one moment that the statement, which had been made by a contributor, could be justified and promptly did the honorable thing by apologizing for having published it.

Receive Royal Pictures Fo National Gallery

Gift of King George Rephrases Portraits Destroyed By Fire

Ottawa.—Pictures of King George, Queen Mary, Prince of Wales, King Edward and Queen Alexandra, were received by Eric Brown, director of the National Art Gallery, on behalf of the Canadian Government. These pictures were given by King George and will replace the pictures of these distinguished members of the royal family which were in the old parliament buildings but were destroyed when the buildings were burned in 1916.

Will Tour Canada

Quebec.—Fifty members of the National Council of Commerce, of Britain, headed by Councillor James Stanworth, president of the Chamber, arrived here and immediately proceeded to Montreal by train. The party will tour Canada, staying in Montreal two days before going to Ottawa.

Russia Buys Canadian Wheat

Further Sales Of Canadian Wheat To Russia Are Announced

Winnipeg, Man.—Further sales of Canadian wheat have been announced at the grain exchanges here, so that country has taken another 1,500,000 bushels, bringing her total purchases during the past fortnight to 9,200,000 bushels.

A good portion of the grain was No. 3 Northern Manitoba. Italy is credited with the purchase of one million bushels of Durum wheat recently, mostly from the local market.

Demand from other European countries remains indifferent partly because of the high cost of supplies and partly on account of prospects for large crops on the North American continent this year.

Feeling Against Noble

Leader Of Italia Expedition Under Criticism In Norway

Oslo, Norway.—Feeling against General Umberto Nobile, leader of the Italia expedition, is making itself felt in Oslo.

The newspaper Atleposten removed a picture of the general from a show case during the day as threats had been made to destroy it.

Several Danish explorers have proposed Fridtjof Hansen as chairman of a court of honor to investigate Nobile's leadership of the expedition. Hansen declined this but said that he thought there were several events in Nobile's expedition that need closer investigation.

CONSERVATIVES WIN IN B. C. BY LARGE MAJORITY

Vancouver.—The Liberal Government which has held power in British Columbia for the past twelve years, and which has been led by Premier J. D. MacLean for the past year, was defeated in the provincial elections, and the Conservative party, under the leadership to Hon. Dr. S. F. Tolmie, was elected to power.

The Conservative party, of which his supporters were defeated, Dr. Tolmie was elected in Saanich.

Premier MacLean was defeated in Victoria; Hon. Dugald Donaghy, minister of finance, in Vancouver; Mr. E. D. Barlow, minister of agriculture, in Chilliwack.

Liberals have been elected in New Westminster, Cranbrook, and Nanaimo.

Conservatives have been returned in Vancouver, six Victoria, four Saanich, Burnaby, with Vancouver, North Okanagan, Chilliwack, Cowichan-Newsdale, Comox and the Islands.

The Liberals gained Cranbrook from the Conservatives, while the Conservatives have gained all six Vancouver seats, five from Liberals and one from the now defunct Provincial party; Chilliwack from Liberals; Comox from Independents; Burnaby from Labor; South Vancouver from Labor.

Mr. Max Allen Smith was defeated by R. H. Pooley, in Esquimalt.

Of the 45 seats contested in the provincial election of 1924 in the Legislature, the Liberals carried 23 in the last contest; the Conservatives, 17; Labor, 3; Provincial, 3; Independents, 1; and Independent Liberals, 1.

Premier-Elect For B.C.

Further Sales Of Canadian Wheat To Russia Are Announced

Canadian Militia Promotions

A Number Of Transfers and Promotions Are Announced

Ottawa.—The rank of "brigadier" recently introduced in the British Army has been adopted in the Canadian Militia, with effect from July 1. The temporary rank of "brigadier" is in substitution for the temporary ranks of colonel commandant and colonel-on-the-staff.

Orders promulgated from defence headquarters announce a number of important promotions in the Canadian Militia. Among them are the following:

Major E. H. Cope has been promoted to the rank of lieutenant-colonel and to command the Vancouver Regiment with regimental headquarters at Vancouver, B.C., vice lieutenant-colonel B. G. Wolfe Merton, M.C., who has been transferred to the reserve of officers.

Major W. W. Henderson has been promoted to the rank of lieutenant-colonel and to command the 2nd regiment of the Alberta Mounted Rifles, with regimental headquarters at Pincher Creek, Alta., vice Lieutenant-colonel J. H. Jackson, transferred to the reserve of officers.

GENERAL NOBILE TO RETURN HOME IN QUIET MANNER

Kings Bay, Spitzbergen.—The man who came from Italy in a giant airship and circled the North Pole already has his departure date set.

General Umberto Nobile, commander of the dirigible Italia, will return home on a coal freighter, avoiding all possible ports of call, it was announced by one of his associates.

The general will travel over an unknown route to an unannounced destination where he will be picked up by a motor-driven schooner and taken to Germany or France. It was said he would leave in a few days.

Nobile will not travel with the men who went into the Arctic with him. Several of them were left on the ice and six others have been lost in the wreckage of the Italia, probably to death.

The seven men who were rescued by the steamship Krasin, after Nobile had been brought out by the Swedish aviator, Captain Einar-Paas Lundberg, will return at least a part of the way, the board of the Italia's ship, Clitta Di Milano.

Nobile will avoid touching at any port in Norway. As far as possible he will remain in Norway until toward the Italian polar expedition since two of Nobile's companions, Captain Adalberto Mariano, and Filippo Zappi were picked up on the ice to tell Dr. Malmgren, Swedish scientist, had been left behind at his own insistence to die by a grave scooped out of the ice.

Mariano and Zappi arrived with five other rescued Italians on the Clitta Di Milano probably will proceed to Narvik as soon as possible with the intention of returning to Italy to continue the search for twelve lost men—six with the Italia, and six, including Roald Amundsen, in a French seaplane, which left Tromsø, Norway, June 18, to search for Nobile.

Information from Stockholm indicated the government would order the rescue expedition under command of Captain Thorberg to return immediately to Sweden.

ASSASSIN OF GEN. OBREGON IS IDENTIFIED

Hail Damages Crop Of Wheat King

Experimental Plots Of G. C. Mitchell, Daniels, Are Burned

Dublin, Ireland.—The assassin of J. C. Mitchell, Saskatchewan Wheat King, reigning the international crown, were seriously jeopardized by the worst hail storm experienced in this district, which ruined many crops.

Mr. Mitchell had 240 acres of wheat completely ruined and on 50 acres, a 50 per cent. loss. Fortunately the hail did not damage 150 acres of first and second generation of experimental grain.

The damage to the Mitchell crop will be far reaching consequence to the wheat market in the West, which is included in the damaged crop.

Mr. Mitchell had 240 acres of wheat completely ruined and on 50 acres, a 50 per cent. loss. Fortunately the hail did not damage 150 acres of first and second generation of experimental grain.

The damage to the Mitchell crop will be far reaching consequence to the wheat market in the West, which is included in the damaged crop.

"Safety First" on the Highways

At the risk of being somewhat tiresome, the writer of this column feels impelled to once again direct attention to the subject appearing as the title to this article. Justification for such action is, however, any justification is needed, to be found in certain well established facts.

In the three prairie provinces last year the number of motor cars registered exceeded half a million.

In all three provinces, Governments and municipalities are straining their resources in the construction and improvement of good market roads and provincial highways, and every mile so constructed or improved results in an increase in motor vehicular traffic and an increase in the speed at which most of the cars travel.

In the improvement of highways, advances are being constantly made in the direction of making them as nearly as possible "safe" through increases in width, reduction in grades and curves, guard rails at curves and danger spots, and a standardized system of marking the highways, indicating routes, turns, curves, railway crossings, danger spots, etc.

On the other hand, the number of motor cars is increasing rapidly and speed of travel, with mechanical price reduction, the result is becoming almost universal. It is true, of course, that four-wheel brakes, and other safety devices, are being added, and manufacturers are interested and active in making their cars as "fool proof" as they can be made.

The fact to emphasize, and which it is important should be drilled into the minds of every motorist, is that no matter what Governments and municipalities do in the matter of road construction, and no matter how strongly and carefully motor cars may be built and equipped from the prevention of accident standpoint, the human element remains. Neither roads nor cars can be made "fool proof," and the unfortunate fact is that the reckless driver is just as great a danger to others as he is to himself. If the highways of the country are to be made safe, it is evident that there must be a decided change in the attitude and conduct of many thousands of motor car drivers, and the public generally.

An address before the annual convention of the Union of Saskatchewan Municipalities, Hon. S. J. Lefebvre, member of the easily recognizable "Safe" Firestone team, representing the Province, stated that he had recently read in a newspaper that someone was either killed or seriously injured every forty seconds in an automobile accident in the United States, and that during 1927 approximately 26,618 persons were killed and 793,700 injured in such accidents. He further referred to the fact that at a conference held in the Parliament Buildings of Ontario it was revealed that 1927 automobile accidents cost 422 lives in Ontario, an increase of 124 over 1926, and 3,976 others were injured. It was further reported that fatalities were in the proportion of eight to each one thousand car licenses.

These appalling figures and certainly indicate the need of somehow controlling this great modern convenience. What was the cause of these accidents? Were they preventable? The results of investigations in the United States show that 11,765 highway accident fatalities in 1927 were caused principally by motorists, of which 3,785 were caused by inattention, 2,706 as a result of speeding, 2,353 through traffic violation, 1,059 from intoxication, and 1,882 from mechanical causes.

About an equal number of fatalities, 11,367 to be exact, were caused principally by pedestrians, of which number 3,638 occurred through children playing in the street or crossing in violation of traffic regulations, 3,069 from adult walk-ways, 1,819 through inattention, 1,591 as a result of confusion, and 1,250 from other causes.

As compared with these more than 23,000 fatalities caused by the human element, there were only 1,290 resulting from fire, snow or rain, 662 from some defect in the vehicle, 558 from collision, 383 from road defects, 244 from strong lights, 244 from poor street lighting, and 165 from confusion in dimming lights. In other words, physical conditions were responsible for 3,426 fatalities as contrasted with over 23,000 for which people themselves were responsible.

Surely such a record provides ample justification for repeatedly urging people to exercise care, to realize that Common Sense will prevent accidents and should be applied, that the Safe way is the Safe way.

Prominent Visitors From Ireland

Prepared For Emergencies

Marques Of Dufferin and Ava Will Make Tour Of Canada

The Marques of Dufferin and Ava, speaker of the senate of Northern Ireland, who is a son of a former prime minister of Canada, was a passenger on the Empress of Scotland, which arrived at Quebec recently. In a short interview, he declared it was his intention to see Canada from coast to coast on his present stay here. Regarding the industrial situation in Northern Ireland, the marques declared that, with the exception of a slight improvement in the shipbuilding industry at Belfast, there was little change as compared with a year ago.

Father (to his old friend's pretty daughter): "Good-by, my dear, I won't kiss you, I have such a cold." His son (with alacrity): "Can I do anything for you, father?"

The first typewriter was invented by an Englishman early in the 18th century; the first workable pattern, however, was designed in Detroit just 100 years ago.

Commander Byrd's Expedition Will Be Self-Reliant Unit

Commander Richard E. Byrd's Antarctic expedition will be a self-reliant unit and if disaster should befall it no outside aid will be expected.

In a statement to the Associated Press, Commander Byrd said:

"We are to have three aeroplanes and the most up-to-date radio equipment available. When sections of the expedition are separated there will be constant inter-communication, and if trouble should befall one section the rest would immediately go into action as an organized relief body."

National Fish Week

Canada is to have a national fish week from October 29 to November 4, inclusive. It was decided at the closing session of the annual gathering of the Canadian Fisheries Association in Montreal. The fish week will be preceded by an intensive national publicity campaign.

It's all work and no play with many would-be dramatists.

Third Wrigley Marathon

Ernst Vierkotter a Sure Entry in This Outstanding Event

While much dissatisfaction has been expressed by Vierkotter and his manager regarding the shortening of the distance for the Third Wrigley Marathon, again to be conducted by the Canadian National Exhibition this year, there can be no question about his entering as he is daily training in Lake Ontario.

He seems to be carrying more ariodipups than he did last year, and experts say that he is a little sluggish. This, of course, is the stage of the race, but it is the Canadian who is the size of a young elephant and swims more or less sluggishly in consequence. Both of them will undoubtedly take this off in the course of their intensive training, so that comparisons are more or less impossible at this time.

Vierkotter is a great swimmer and unlike most distance men is fast. Witness his fast of last year when he swam the first five miles under 28 minutes each. That should be fast enough to win this year's Marathon.

From a spectacular standpoint the Third Marathon will surpass the Second. The course will be along the sea wall, and will be in full view of the tens of thousands of spectators who will again flock to see the great event.

The entries are now coming in thick and fast and it is estimated that they will exceed those of last year.

GUARD BABY'S HEALTH IN THE SUMMER

The summer months are the most dangerous to the health of the community in this season, which are characterized by heat, sun, herbs and dentistry, come on so quickly that often a little one is beyond aid before the mother realizes it. No one can prevent these troubles, or if they do come on quickly to banish them. No one medicine is of such aid to others as is Baby's Own Tablets. They regulate the stomach and bowels and are absolutely safe. Sold by medicine dealers in boxes of 25 cents a box from The Dr. Williams' Medicine Co., Buffalo, Ont.

London will add 75 double-decked omnibuses fitted with pneumatic tires.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Many Farmers Join Pool

Estimated That About Half the Wheat Crop Of West Contributed By Pool

The Canadian Wheat Pool, which embraces 142,000 Canadian farmers, continues to add to its membership. In a single day this month contracts were received at head office covering a total of nearly 100,000 acres of grain.

Under the Canadian Wheat Pool system farmers voluntarily sign contracts in which they agree to market all their wheat through the Pool for a period of five years. About half the wheat crop of Western Canada is controlled in this way, and sales by the Pool average over a million dollars for every business day of the year. It is claimed that the Pool has increased the price of wheat to the farmer without increasing the price of bread to the consumer.

Cambodia Fox Farms

Forty thousand silver black foxes were registered in Canada from various fox farms during the past year, the report of the Canadian Silver Black Fox Association shows. Saskatchewan registered only 793 of the foxes, but fox farming in this province not yet having reached the proportions attained in other sections of the Dominion.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but also as a tonic and a medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without the growth of the child will be retarded and its constitution weakened.

Did Not Find Out

A popular Scotch doctor who was very popular about his age was away suddenly. His friends were worried to the mourners that the secret would be disclosed as the plate in the basket. But when they looked at it, all it disclosed was:

Dr. Caleb McNabb.

Phantom Radios

Device whereby Radio Fans Can Broadcast Through His Loud Speaker

The genius of Earl W. Davidson, a railway telegraph operator, who likes to tinker around with radio sets in his off hours, has made it possible for the long suffering radio fan to shout his sentiments right into his loud speaker with the assurance that people for miles around will hear his pronouncements.

The workings of the phantom radio, invented by Davidson, are very simple. The effect is to transform any loud speaker into a broadcasting microphone whose waves will ride out into the air on the wave length of the station into which the set is tuned.

At his home at Terre Hill, Penn., Davidson has talked through his receiving loud speaker to his neighbors as far as fourteen miles, getting his messages over by means of jingles of broadcasting programmes from Chicago, Pittsburgh and New York.

He says the secret of his invention is in the arrangement of the circuit, in which he uses a crystal and three ordinary tubes.

Davidson came to New York last week to demonstrate the "Phantom Radio." He has gone back home to continue his experiments.

Service

THE Firestone Dealer's trained service men apply tires and tubes right, and help you keep them in condition to get more mileage. They service every tire they sell. This is one reason why Firestone Gum-Dipped Tires are breaking mileage records around town and everywhere else.

Firestone builds in the miles—Firestone Dealers get them out for you. They save you money and serve you better.

Always put a Firestone steam-welded, leak-proof tube in your Firestone tire.

German Prisoners Released

Thousands Of Prisoners Regain Freedom Under Amnesty Bill

The jail doors in Germany were opened for release of thousands of prisoners recently, when the Reichstag passed by motion that two-thirds of necessary majority the proposal of the amnesty bill since the success of the Republican revolution.

Among those to be set free under the measure are the last of the Imperial Army soldiers who were sentenced by the Kaiser's court martial for desertion and other offences.

The bill was opposed only by the Bavarian Folks party of the small Hanover party.

After passage of this measure the Reichstag adjourned until the autumn.

Every Home Needs Minard's Liniment.

"Give me a sentence using the words 'assume' and 'street.'

"We avenue baby at our house and it's street times as noisy as any I ever heard."

The boy who turns out as smart as his mother predicts is truly a wonder.

Recipes For This Week

(By Betty Barclay)

GINGER ALE LEMONADE

4 lemons.
1 pint ginger ale.
1/2 pints water.
1 cup sugar.

Place a small block of ice in a pitcher. Mix with the juice of four lemons. Mix one cup of sugar, one and one-half parts of water, and one pint of ginger ale. Pour into pitcher and stir thoroughly. Allow to stand few minutes before serving. (Serves 6 persons.)

A REAL MEAL SALAD

1/2 cup neptuna raisins.
1 cup cold cooked meat, cut in cubes.
1 tablespoon granulated gelatine.
1/4 cup cold water.
1 cup boiling water.
1 tablespoon sugar.
1/4 teaspoon pepper.
Speck paprika.

1 teaspoon Worcestershire sauce.
1 cup diced celery.
Plump and drain raisins. Soften gelatine in cold water for 5 minutes, then dissolve in boiling water. Add vinegar, salt, pepper, paprika and Worcestershire sauce. Let cool. When mixture starts to thicken stir in the plumped raisins and the meat cubes. Turn into a cold, wet, square pan. When firm cut in cubes. Arrange on lettuce. Sprinkle diced celery over top. Garnish with a spoonful of mayonnaise and a dash of paprika.

The Friend of All Sufferers—Dr. Thomas' Electric Oil is a valuable remedy to all those who suffer pain, whether it is located in the head or elsewhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found whenever enquired for.

When some men bury the hatchet after quarrelling they go right out and dig up an ax.

Granite monuments of the Egyptians were cut with copper chisels.

The confirmed bachelor prefers to settle his affairs out of court.

What's between Indoors and Outdoors?

The world is divided into two parts, outdoors and indoors. Between the two lies a problem. The answer has a vital effect on those who are indoors.

If wind and dampness can be kept outdoors, naturally indoors will be comfortable and healthful to the occupants.

You can solve this problem with Hercules Permanent Building Paper. In three grades, x, xx, xxx—Hercules is tested and wind proof, damp proof on a wind proof. Test it yourself. A line will bring samples. Write us.

Personal and Local

Born: To Mr. and Mrs. Geo. Roper, Fifth Street, on July 5th, a son.

R. Bromley of Medicine Hat was a visitor here over the week-end.

Supt. and Mrs. McCord and children are spending a month's holidays west of Edmonton.

Harry Clark left on Friday night for two weeks' holiday at Calgary and other points in the province.

John Shanks, president of Nordegg Collieries, was here on a brief visit during the week.

Mrs. Halliwell returned on Sunday morning from a visit with relatives in Calgary and Edmonton.

Jessie McMurdo of Pincher Creek is visiting with Mrs. Robert Holmes, Sixth Street, during school holidays.

Mrs. Fairhurst left on Tuesday morning on a holiday to visit her daughter at lethbridge.

R. C. Sproul and A. F. Turner, auditors of the Bank of Commerce, were making their official visit to the local office this week.

J. M. Allan and daughter left on Sunday morning by car for west of Red Deer, Alta., where Mrs. Allan is spending a few weeks with relatives.

Believe in your home town, work for it and try and make it the ideal town that you or anybody else would be proud and satisfied to live in.

Remember that Lundbreck Falls is just a nice afternoon or evening drive in your car, and that the Red Tab Tea Room is a very inviting place to call at before making the return trip.

Mrs. Fairhurst and daughter Peggy, and Mae Bell were among the Coleman people who visited the Calgary Stampede, spending a very enjoyable time the last day of the big show.

Mrs. Donald MacKinnon left last week for Orangegate, Cape Breton, N.S., to visit there for a while. She was accompanied east by her brother, Malcolm Eeaton of Eeaton, Alta.

Sam's Service Station reports an increasing number of tourists passing through the week, the fine weather and improved roads evidently having their effect.

Mr. and Mrs. Maurice W. Cooke and children left on Sunday for a two weeks' motor trip, going by way of the Windermere trail to Lake Louise and Banff.

A car of tourists from Weyburn, Sask., en route to the coast cities, in passing through town last Thursday, paid The Journal office a friendly visit to renew acquaintance with the editor.

Mac Moores returned on Sunday morning from the Anglican summer school, Banff, which was very successful and greatly enjoyed, though mosquitoes were very much in evidence at the famous resort.

Mrs. Dunlop recently journeyed to Calgary and Edmonton by car, accompanying Mr. and Mrs. McLean, of Bellevue, and the trip was made via the famous Windermere trail, the beauties of which are always a source of great pleasure to tourists.

Ross Pöll, former principal of Coleman schools, now of Central High School, Calgary, is visiting his parents here and renewing acquaintances. He still finds that the mountains have a lure and will spend part of his vacation here.

J. O. C. McDonald returned last week from Brule, Alta., to which place he and Mrs. McDonald moved several months ago. He will resume work with the McGillivray Creek Coal & Coke Co., Ltd., and Mrs. McDonald will follow shortly, when she will take up residence in their house here.

St. Alban's Church

Services for next Sunday, July 29, 9:30 a.m., Holy Communion, Coleman.

11:15 a.m., Matins, Blairmore. There will be no choir practice on Friday.

The same hymns will be used as for last Sunday.

The following represented the Parish of Coleman and Blairmore at the late Bishop Pinkham's funeral: Rev. A. D. and Mrs. Currie, Mrs. Ellen Cartwright, Miss Cartwright, Miss Mae Moores and Mr. H. W. Clarke.

The ceremony was performed by the Rector, the Rev. A. D. Currie.

The ceremony was performed by the Rector, the Rev. A. D. Currie.

Orangemen Celebrated Near Lundbreck Falls

The "Glorious Twelfth" was enthusiastically celebrated at Lundbreck Falls by Coleman and Pincher Creek lodges, together with the L. O. B. A. lodges of those places, and the chief speaker was John Herren, veteran of 36 years in the Orange Association, who is well known throughout Southern Alberta. Robert Holmes of Coleman gave an address.

On the children and tug-o-war, for the adults were feature of the afternoon. Following on this party, which by this time had developed keen appetites following their exercises, enjoyed the lunch and refreshments. Over a hundred took part in the observance of the day.

Here and There

(107) Quebec, Quebec.—The most successful meeting of the Canadian Seed Growers' Association, closed at the Chateau Frontenac on Saturday, June 16th, with a record demand for registered seed for all Canada. The total value of the 77,919 bushels; oats, 56,815 bushels; barley, 16,637 bushels; and alfalfa, 10,749 bushels.

Montreal, Quebec.—Fur prices have advanced since the early spring, as reflected in the three-month average, which recently included here. Nearly 50,000 carmine pelts sold at 20 per cent above the level of the last sale, with a top price of \$28.00, and up to 20 per cent with the highest sale at \$46.50, while wolf pelts brought a ten per cent advance over the price level of early spring.

Canadian diners in the Old Country do not consider a complete meal without Canadian ice cream for dessert. Thus, for the High Commission's annual dinner in London, June 19, two eight-pint tubs of the delicate dessert were ordered and these were delivered by Canadian Pacific Express in ample time for the dinner to be served. The same thing was done last October for a special Canadian dinner held at Manchester by the Canadian Trade Commissioner there.

Ottawa, Ontario.—By the end of the second 15 flying club will have been established throughout Canada, according to advice from the Air Board. A total of \$170,000 is being spent on the clubs this year in the hope of encouraging civilian flying. Clubs have already been established at Montreal, Toronto, Ottawa, Hamilton, Halifax, St. John, Regent, Moncton, Edmonton, Victoria and Granby. One at Halifax and another at London are about to enter the list.

Transportation of small but valuable packages by air from Canadian Pacific liners at Rimouski and Gaspé is now possible by saving about 24 hours in time is becoming increasingly popular. After Montreal, Toronto, London and Gaspé, the Canadian liner will be the Wall of the Chateau Frontenac, by the time of the ceremony were officers of the Fusiliers from England and a detachment of the Canadian Fusiliers of London, Ontario, who are affiliated with the English corps. The Chateau Frontenac occupies the site of the old Chateau St. Louis which was the military headquarters during the sieges.

Inspection of the "Duchess of Atholl" was made by the Canadian Pacific liner, which recently made her maiden trip to Montreal, in order to test the extreme suitability of these "Duchess" ships for tropical travel. Verification of the ballroom system of individually controlled outlets, cool air is forced under gentle pressure to every part of the ship. Broad sun-decks and an open-air swimming pool add to the luxurious appearance of the ship and it has now been decided that the "Duchess of Atholl" shall be used on the South Africa cruise next year.

HIRST-BELL MARRIAGE

A quiet wedding took place at St. Alban's Church on Monday at 2:30 p.m., between John Henry Hirst and Martha Bell.

H. Hirst, brother of the groom, acted as best man and Miss Kathleen Milley as bridesmaid. A number of friends and relatives were present in the congregation.

The ceremony was performed by the Rector, the Rev. A. D. Currie.
